# TIPS & STRATEGIES

## MASTER YOUR SPECIAL

Every fighter has a unique special move. Learn when to trigger it – specials deal 1.5x normal damage. Save it for when your opponent is low on health for a knockout blow.

## BLOCK STRATEGICALLY

Blocking absorbs 85% of damage but pins you in place. Use it to bait opponents into wasting their special, then counter-attack immediately after they whiff.

## BUILD COMBOS

Chain consecutive attacks to build combo multipliers shown on screen. Don't let up! Keep the pressure on – a 5x combo can turn the tide of any round.

## CONTROL SPACE

Use the arena's full width. Corner your opponent to limit their escape options. Keep moving – a stationary fighter is an easy target for specials.

## KNOW YOUR MATCHUP

High ATK fighters like Humungosaur and Vilgax deal massive damage but are slow. Use fast fighters like XLR8 or Jetray to dance around them and punish every mistake.

## WATCH THE CLOCK

If you're ahead on HP, play defensively in the last 10 seconds. Block more, avoid risky attacks. The timer win goes to whoever has the most health – protect your lead!
